

Good Morning Primary,

Has anyone completed an entry for Sims competition yet? In this amazing competition you can win a Harry Potter mug which reveals a secret map when hot! As well as a thermochoic pad.

The competition has been designed by Sim, some of you have worked with Sim already or know her from primary break time. The idea is to design a smart object using colour, Stone Island designed this jacket which changes with heat, *"Man's not hot!"- Oh yes he is!*

To win follow Sim's power point and worksheet attached.
