

Name Class Date

Checkpoint 1 Target 4

Aims

In this activity you will revise the main ideas in Chapter C1 *Atomic structure*.

Learning outcomes

- complete the spider diagram showing the key ideas from this chapter
- add your own pictures and bullet points to show the links between these ideas.

Task

The spider diagram on the following page shows the main ideas in this chapter in quite a lot of detail. The spider diagram is split into eight sections – one for each of the double page spreads in your student book.

Complete the diagram to show the key information from this chapter. Spaces have been left for you to add the missing words. Try to include some pictures and different colours in your spider diagram. Think about how the key ideas link together and try adding some arrows to link the topics together.
